SYSTEMS AND COMPUTERS IN JAPAN

CONTENTS FOR 1990

NUMBER 1

Page

Takashi Watanabe, Sadao Hizuka, Hidehiko Sanada, and Yoshikazu Tezuka: Time-Event Driven Scheme for Distributed Simulation with Advance Processing 1

Yoshiyuki Nishinaka, Yoshihiro Tsujino, and Nobuki Tokura: A Pointing Method for Graphics 13

Seiichi Nakagawa and Yasuhide Hashimoto: Segmentation of Continuous Speech by HMM and Bayesian Probability 23

Norio Shiratori, Yao-Xue Zhang, Kaoru Takahashi, and Shiochi Noguchi: Construction of a Protocol Synthesis Environment and Its Implementation 34

Manabu Ichino: Optimum Feature Selection for Decision Functions 50

Kenji Koyama and Kazuo Ohta: Identity-Based Conference Key Distribution Systems . . . 60

Junji Yamato, Ikuo Ishii, Hideo Makino, and Toshinori Inaba: Highly Accurate Segment Detection Using Hough Transformation 68

Masayuki Numao and Masamichi Shimura: A Learning Meth d Based on Partial Structures of Explanations 78

Hiroyuki Kudo, Yoshinao Koizumi and Tsuneo Saito: High-Efficient Coding for CT-Image Archiving 86

Noritaka Nishihara, Kenichi Morita, and Shigenori Iwata: An Extended Syllogistic System with Verbs and Proper Nouns, and Its Completeness Proof 96

NUMBER 2

Toshiro Tachibana, Hideo Nakano, Yoshiro Nakanishi, and Mitsuru Nakao: An Algorithm Using Modular Arithmetic for the Subset Sum Problem 1

Mizuhito Ogawa and Satoshi Ono: Anomaly Detection of Functional Programs Based on Global Dataflow Analysis 11

Yuji Iwahori, Hiroyuki Kamei, and Shoichiro Yamaguchi: Point Source Illumination Stereo for Objects with Uniform Reflectance 23

Yasuo Seki: Stereo Matching Using Segment Shape as Constraint 34

Yuichiro Fukuda: Analysis of Superposed Moiré Patterns in Halftone Screen 49

Seungkuen Paek, Masato Nakajima, Tatsuru Morozumi, and Shin'ichi Yuta: A Shift-Variant Deconvolution for Aperture Correction of Collimator in Emission CT—Experimental Verification 56

Page

Takeshi Agui, Tomoharu Nagao, Hitoshi Misawa, and Masayuki Nakajima: A Data Management Method for Maps Using Band Division of Data Plane 65

Osamu Nakamura, Hiroyoshi Nakagawa, and Toshi Minami: Image Processing Expert System with Knowledge-Generative Function — Application to Footprint Image Understanding 74

Sakio Hioki: Image Restoration Method by Spectral Linear Prediction and Its Application to Artificially Made Images 87

Yoshiharu Morimoto, Yasuyuki Seguchi, and Masao Okada: Screening and Moiré Suppression in Printing and Its Analysis by Fourier Transform 98

NUMBER 3

Mikio Shindo and Etsuji Tomita: A Simple Algorithm for Finding a Maximum Clique and Its Worst-Case Time Complexity 1

Mitsuo Ishii, Morio Ikesaka, and Hiroaki Ishihata: A Highly Parallel Processor CAP 14

Hiroshi Matsuo, Akira Iwata, Isao Horiba, and Nobuo Suzumura: Reconstruction Algorithm for Cone-Beam X-Ray CT Using Inverse Filtering 25

Ke Juan Peng, Kunio Onda, and Yoshinao Aoki: A Parsing Method for Context-Sensitive C-Plex Grammars Using Logic Programming 35

Akinori Saitoh, Takeshi Tsushi, Yoshihiro Tsujino, and Nobuki Tokura: A High-Speed LAN Model Using an Information-Updating Algorithm 47

Tsutomu Ishikawa: Universal Fault-Tolerant Hypercube Architecture without a Switching Mechanism 57

Tomoharu Nagao, Takeshi Agui, and Masayuki Nakajima: A Method of Extracting Similar Figures Using Polar Features 66

Tetsuro Kakeshita and Yahiko Kambayashi: Optimal Concurrency Control Schedulers in Terms of Secondary Storage Access 76

Yasuhiro Nakamura and Kineo Matsui: A Unified Coding Method of Image and Text Data Using Discrete Orthogonal Transform 87

Yasunori Nagata, Chotei Zukeran, and Chushin Afuso: A State Assignment for p-Valued Sequential Machines 93

Tsuyoshi Kawaguchi and Tamotsu Maeda: A Parallel Branch-and-Bound Algorithm for a Torus Machine 101

NUMBER 4

Naoki Okabe and Jun-ichiro Toriwaki: The Pulse Extension Method for the Variable Neighborhood Distance Transformation of 2- and 3-Dimensional Digitized Pictures 1

Yoichi Yamashita, Ken'ichi Taniguchi, Riichiro Mizoguchi, Masuzo Yanagida, and Osamu Kakusho: A Support System for Constructing Rule Base for Speech Synthesis by Rule. Automatic Extraction of Synthesis Rules. 15

Tomoaki Nakano, Norio Takeda, and Shin Yamamoto: A New Recognition Method for Stamped and Painted Alphanumerals 26

Akinori Yonezawa: Parallel Processing Description in the Concurrent Object-Oriented Language ABCL/1 36

Page

Eiichi Tatsumi, Kunio Fukunaga, and Tamotsu Kasai: Binocular Stereograph Based on Structures of Edge-Arcs 45

Hai Hong, Toshio Kawashima, Tsuyoshi Yamamoto, and Yoshinao Aoki: Polyhedra Identification Using the Orthonormal Constraints of Rotation Matrix 55

Noboru Niki and Yoshizou Takahashi: Parallel Computation of the Fast Fourier Transform on a Binary Tree Multiprocessor 65

Eiji Okamoto and Kazue Tanaka: Proposal for Cryptographic Key Distribution Systems Based on Identification Information 76

Makoto Hiroshige, Yoshikazu Miyanaga, and Koji Tochinai: An Adaptive Signal Processing System for Voiced Speech with Automatic Spectrum Selector 85

Kazutoshi Koga and Hidetoshi Miike: Optical Flow Analysis Based on Spatio-Temporal Correlation of Dynamic Image 97

NUMBER 5

Rikio Onai and Yukio Tsuruoka: Proposal and Evaluation of Dynamic Object-Oriented Programming 1

Yoshinori Yamaguchi, Kenji Toda, and Toshitsugu Yuba: Evaluation of a Data-Driven Machine with Advanced Control Mechanism 15

Kazuhiko Iwasaki: Analysis of Fault Detection Probability of CMOS Combinational Circuits and Its Application to Signature Testing 29

Koichiro Ishihara: Cache Storage Control under Multiprocessor Environment . 39

Yasuaki Nakamura, Shigeru Abe, Yutaka Ohsawa, and Masao Sakauchi: Data Structure for Multilayer N-Dimensional Data Using Hierarchical Structure . 50

Hiroyasu Koshimizu and Munetoshi Numada: On a Fast Hough Transform Method PLHT Based on Piecewise-Linear Hough Function 62

Toshiyuki Gotoh, Yoshiyuki Ohta, Masumi Yoshida, and Yoshiaki Shirai: High-Speed Algorithm for Component Labeling 74

Yoshiteru Ishida: An Application of Qualitative Reasoning to Knowledge Acquisition in Process Diagnosis. Automatic Rule Generation by Qualitative Simulation 85

Toshie Tanaka, Takao Kawashima and Ken-ichi Kanatani: 3D Recovery of Polyhedra by Parallelism Heuristics 98

NUMBER 6

Noburo Katta, Hideya Takahashi, Kenji Matsushita and Eiji Shimizu: Relational Matching Using a Neural Network 1

Yoshikazu Ueda and Naohiro Ishii: Estimation for Spread Forms of Spindle Waves in Multichannel EEG 10

Michitaka Kameyama, Shugang Wei and Tatsuo Higuchi: Design of an RSA Encryption Processor Based on Signed-Digit Multivalued Arithmetic Circuits 21

Yutaka Tanaka and Taiji Nishizawa: Improvement of HDTV-PAL Standard Converter Using Motion-Compensation Technique and Detection Probability of Motion Vectors 32

Page

Katsumi Sakata and Kiichiro Izumida: Filtering for Dynamic Systems Under Unknown State Transition Matrices 43

Noboru Niki: A Reconstructed Image Analysis and a Practical Algorithm of the Direct 2-D Fourier Transform 51

Seiichiro Sakurai and Masamichi Shimura: Knowledge Level Learning in a Problem Solver 64

Hiromitsu Yamada and Kazuhiko Yamamoto: Directional Feature Field and Parallel Operations for Binary Images: Twisting Operation for Arbitrary Directional Propagation by 8-Neighbors 71

Kaoru Suzuki and Masahiko Yachida: Establishing Correspondence and Obtaining 3-D Information in Dynamic Images 81

Masateru Harao and Kouji Iwanuma: Automated Design of Circuits from Recursion Equations Using Theorem-Proving Technique 95

NUMBER 7

Taichi Nakamura, Syouhei Sugawara, and Tsukasa Maejima: A Multiple-Window Display . . 1

Shigeru Yamada, Ryushi Isozaki, and Shunji Osaki: A Software Reliability Evaluation Tool: SRET 12

Kiyoshi Nishiyama and Tutomu Mita: NMR Image Reconstruction Method Using Complex Kalman Filter 23

Jigui Li and Toshihide Ibaraki: Distributed Database Concurrency Control by Cautious Schedulers with a Central Clock Site 35

Kiyoshi Tanaka, Yasuhiro Nakamura, and Kineo Matsui: Embedding the Attribute Information into a Dithered Image 43

Seiichiro Kamata and Eiji Kawaguchi: A Study on a Data Compression Method for Multivalued Images Through Bit-Plane Decomposition Technique 51

Tadahiko Kimoto and Yasuhiko Yasuda: A Method of Frame Representation of Moving Objects for Knowledge-Based Coding 63

Yoshihiro Kawai, Noboru Ohnishi, and Noboru Sugie: A Support System for the Blind to Recognize a Diagram 75

Seiki Inoue, Masahiro Shibata, and Eisuke Nakasu: Component Image Filing System for Image Synthesis 86

Shigemi Nagata, Nobuo Watanabe, and Kazuo Asakawa: Mobile Robot Control by Neural Networks 96

NUMBER 8

Nariyoshi Yamai, Shinji Shimojo and Hideo Miyahara: A Load Balancing Algorithm on Multiprocessor Time-Sharing Systems 1

Yasuko Gotoh, Kazuo Takaragi, and Ryoichi Sasaki: A Method for Rapid RSA Key Generation 11

Page

Nagatsugu Yamanouchi: Behavioral Specification of Nondeterministic State Machines by Event Sequence Sets 21

Takashi Yokozeki, Mitarou Namiki, Masaki Nakagawa, and Nobumasa Takahashi: A Virtual Optical Disk Method to Realize Rewritability and Revision Control on a Write-Once Optical Disk 34

Takeshi Kaneko and Takeshi Nakajo: Determination Method to Identify Effective Software Testing Areas: Detection of Software Defects Related to External Specification Changes 45

Takeshi Kasuga, Michitaka Kameyama and Tatsuo Higuchi: Design of a Fault-Tolerant Arithmetic Circuit Based on Distributed Coding and Its Evaluation 59

Tomoharu Nagao, Takeshi Agui, and Masayuki Nakajima: An Extraction Method for Same Figure Using Polar Features 72

Kiichi Urahama: Stability of Neural Networks and Convergence of Their Sensitivity Computation Algorithms 82

Itsuo Kumazawa: Effectiveness of Making Internal Representations Redundant in Neural Networks for Solving Optimization Problems 89

Hideki Kohno, Hidemi Shiono, Katsuhisa Usami, and Yoshio Suzuki: Monochromatic X-Ray CT Using Synchrotron Radiation 101

NUMBER 9

Michitaka Kameyama, Takafumi Aoki, and Tatsuo Higuchi: Design of a Highly Parallel Ultrahigher-Valued Logic Network Based on a Bio-Device Model 1

Yuzo Hirai: Pattern Matching by Neural Network 13

Hideyoshi Tominaga, Naohisa Komatsu, Takeshi Miyashita, and Tsuyoshi Hanamura: A Motion Detection Method on Video Image by Using Hierarchical Pixels 24

Kenichiro Ishii: Design of a Recognition Dictionary Using Artificially Distorted Characters 35

Ikuo Kudo, Moonkyung Chung, and Hideya Koshino: English CAI:A User-Initiative CAI System with Machine Translation Techniques 46

Hiromitsu Yamada and Kazuhiko Yamamoto: Segmentation and Recognition of Color-Dot Characters with Complex Background 61

Hidefumi Sawai, Masanori Miyatake, Alex Waibel, and Kiyohiro Shikano: Spotting Phonemes and Syllables for Continuous Speech Recognition Using Time-Delay Neural Networks 71

Toshio Irino and Hideki Kawahara: A Method for Designing Neural Networks Using Nonlinear Multivariate Analysis — Application to Speaker-Independent Vowel Recognition 80

Tatsuo Matsuoka, Hiroshi Hamada, and Ryohei Nakatsu: Syllable Recognition Using Integrated Neural Networks 89

Yukio Matsuyama, Hisafumi Iwata, Hitoshi Kubota, and Yasuo Nakagawa: Precise Visual Inspection of LSI Wafer Patterns by Local Perturbation Pattern Matching Algorithm 99

NUMBER 10

Page

Haruo Yoda: An Algorithm for Determining Shape Descriptors Based on Video-Rate One-Pass Image Processing Technique 1

Tadao Saito and Atsushi Shirahata: Performance Evaluation of Multilayered Protocol . 16

Masanobu Abe, Shin-ichi Tamura, and Hisao Kuwabara: A Speech Modification Method by Signal Reconstruction Using Short-Term Fourier Transform 26

Yasushi Takaki, Susumu Horiguchi, Yoshiyuki Kawazoe, and Yoshiharu Shigei: Performance Evaluation of the Clustered Multiprocessor System 35

Yoshiyuki Nishinaka, Yoshihiro Tsujino, and Nobuki Tokura: Evaluation of Pointing Efficiency Influenced by the Difference of Bit-Map Resolution 47

Tsukasa Maejima, Taichi Nakamura, and Shohei Sugawara: A Highly Performable Window Virtual Function for the Multiwindow System 56

Takashi Watanabe: Improved Dithering Methods for Color Quantized Images 68

Toshio Asano, Seiji Hata, Susumu Koishikawa, and Youichi Shimizu: Automatic Line-Shaped Defect Evaluation of Solid-State Imaging Device 78

Kiyoshi Mizui, Masafumi Hagiwara, and Masao Nakagawa: Variable Bit Rate Modulo-PCM Using Adaptive Predictor 89

Junji Yamato, Ikuo Ishii, Hideo Makino, and Kazuyoshi Irisawa: Algorithm for Extracting Ellipses Using Weighted Center Points Map 98

NUMBER 11

Yoshiomi Yamachita, Yoshikazu Kawashima, and Masami Sakakibara: A Method of Constructing CPU for Programmable Controllers 1

Fumiyasu Hirose, Koichiro Takayama, and Nobuaki Kawato: A High-Speed Test-Generation Method Using a Test-Generation Circuit 12

Naohisa Takahashi and Satochi Ono: DDS: A Declarative Debugging System for Functional Programs 21

Toshikazu Kato, Koreaki Fujimura, and Hiruyuki Shimogaki: TRADEMARK: Multimedia Image Database System with Intelligent Human Interface 33

Tomoaki Nakano and Shin Yamamoto: A New Character Segmentation Method for Recognition of Stamped Alphanumerals on Automobile Chassis 47

Yoshinao Shiraki and Masaaki Honda: Speaker Adaptation Algorithms Based on Piecewise-Moving Adaptive Segment Quantization Method 58

Naiki Matsuo, Hiroyuki Matsui, and Yukio Tokunaga: Effectiveness of Metaphor in Mailing Procedure on Electronic Mail System 67

Chiaki Yoshida and Akira Watanabe: A Model of Visual Motion Perception for Movements on a Background 75

Hiroyuki Kudo and Tsuneo Saito: Three-Dimensional Tomographic Image Reconstruction from Cone Beam Projections by Single Scanning Method 86

Tomoharu Nagao, Takeshi Agui, and Masayuki Nakajima: Automatic Extraction of Roads Denoted by Parallel Lines from 1/25,000-Scaled Maps Utilizing Skip-Scan Method . . 96

NUMBER 12

Page

Teruhiko Yamada and Hiroshi Nakajima: Pseudorandom Pattern Built-In Self-Test for Embedded RAMs 1

Hidenobu Itagaki: Improvements of NMR Image Quality Using Adaptive Nonlinear Filter . 9

Takashi Toriu, Hiromichi Iwase, and Toshiyuki Gotoh: A Method for Threshold Selection Using Minimum Filtering 16

Akihiro Suzuki, Hiroshi Kanai, Yoshiyuki Kawazoe, Shozo Makino, and Ken-iti Kido: A Method of Generating Template Patterns from a Few Sample Patterns in Character Recognition 25

Xuan Chen, Jun-ichi Hasegawa, and Jun-ichiro Toriwaki: Automated Classification of Pneumoconiosis Radiographs Based on Recognition of Small Rounded Opacities 33

Toru Masuzawa and Yasuhiro Fukui: A Control Method Based on Recognition of Time Sequential Data Transition — Application to Blood Pressure Control 45

Tatsumi Yanai, Kanoh Ono, Susumu Itoh, Eimei Shu, and Toshio Utsunomiya: Methods of Selecting Parameters in Discriminant Analysis of Letter-Cognition Related Visual-Evoked Potential 56

Shunji Maeda, Hitoshi Kubota, Hiroshi Makihira, Takanori Ninomiya, Yasuo Nakagawa, and Yuzo Taniguchi: Automated Visual Inspection for LSI Wafer Multilayer Patterns by Cascade Pattern Matching Algorithm 65

Toru Wakahara: An Iterative Image Registration Technique Using Local Affine Transformation 78

Kaichiro Hatazaki, Yasuhiro Komori, Takeshi Kawabata, and Kiyohiro Shikano: Phoneme Segmentation Expert System Using Spectrogram Reading Knowledge 90

Yasuhiro Komori, Takeshi Kawabata, Kiyohiro Shikano, and Kaichiro Hatazaki: Phoneme Recognition Expert System Using Spectrogram Reading Knowledge and Neural Networks 101

NUMBER 13

Masahiro Takahashi and Takuji Hamada: Evaluation of Mean Number of Detached Stations in Dual Loop Reconfiguration 1

Takanobu Baba, Manabu Kagaya, Tsutomu Yoshinaga, Shinji Suzuki, Katsuhiro Yamazaki, and Kenzo Okuda: Design and Implementation of a Three-Dimensional Color Graphics System on a Parallel Computer MUNAP Using Extended L^6 Language 10

Hirotsugu Kinoshita and Shigeo Tsujii: Information Security of Database Networks . . 22

Kazunori Ozawa and Takashi Araseki: Multipulse Excited Speech Coding Utilizing Pitch Information at Rates between 9.6 and 4.8 kbit/s 31

Haruhiko Nishino, Kenji Akiyama, and Yukio Kobayashi: Acquistiion of 3-Dimensional Object Shape Using Slit-Ray Projection and Reconstruction of Surface Model 42

Takanori Ikegami, Jun-ichi Kato, and Shigeo Ozono: Representation of Knowledge and Sensor Information Based on the Distance Valve Model for Autonomous Mobile Robot 54

Hideo Saito, Akihiro Miyamoto, Tatsuru Morozumi, Shin'ichi Yuta, and Masato Nakajima: Magnetic Field Imaging Using Computer Tomography — Vector Reconstruction 69

Takehiro Fujita, Kosuke Sato, and Seiji Inokuchi: Vision System for Bin-Picking Based on Local Curvature Analysis 79

Page

Xiao-yan Zhu, Koichiro Yamauchi, Takashi Jimbo, and Masayoshi Umeno: Handwritten Character Recognition by a Layered Neural Network 88

Shin-ichi Suzuki, Tsuyoshi Usagawa, and Masanao Ebata: Allocating Resource and Annoyance in Selective Listening 98

NUMBER 14

Masahiro Takahashi: A Reliability Evaluation of a Loop Configuration Method Using a Station Bypass Technique 1

Katsunori Yamasaki: Fundamental Properties of Bottom-Up Pushdown Tree Automata . . 11

Masahiro Tsunoyama and Sachio Naito: A Fault-Tolerant Parallel Processor Based on a Linear Cellular Automaton Model 23

Hiroshi Inai, Takeshi Nishida, Tokumi Yokohira, and Hideo Miyahara: A Performance Model of Layered Communication Architecture 32

Yoichi Seto, Nobuo Hamano, and Fuminobu Komura: A Proposal of an Interpolation Filter with Image Quality Correction Capability 43

Norio Tayama, Weidong Sun, and Isao Otawara: Reconstruction from a View Projection Picture for 3-Dimensional Digital Image 58

Hiroshi Sugiyama and Hidemitsu Ogawa: Image Restoration Using Parametric Partial Projection Filter 67

Haruhiko Nishino, Kenji Akiyama, and Yukio Kobayashi: Extraction of Planar Surfaces from a Set of Line Segments Using the 3-Dimensional Hough Transform 78

Atsushi Imiya, Yoshimi Yamamoto, and Yoshiyuki Nakayama: Image Reconstruction of Rotatory Moving Object from Projections 88
